

BICYCLE BUILD-OFF

EVENT OVERVIEW

Can you imagine growing-up without ever having the opportunity to ride your own bike? Think about the first time you coasted off without your training wheels on; the wind whipping across your face as you peddled faster and faster down the street. One of the rights of passage to adulthood is learning how to ride a bike and impressing your friends with your ability to do a wheelie or launch yourself off a curb. You see, a bike is so much more than just a mode of transportation. It is piece of your childhood and something that every kid should have the opportunity to experience. In Bicycle Build-off, we give local youth the chance to experience life the way it should be. Split into teams, your group will compete in a short Interactive Gameshow to get the crowd engaged before transitioning to the Bicycle Construction. After the teams build their bikes – we will welcome a guest speaker from the partnering Charitable Organization to say a few words about what they do here in our community, as well as what the donation of these bikes will mean to the receiving children.
